

Your contractor should measure your existing door to ensure the new door has the same dimensions.

Composite Unfinished (exterior) Entry Door

Composite Unfinished Entry Door has a simple design that accents the natural wood appearance of this door. It is made to deliver years of worry-free service. The slab can be installed to either side of the door opening based on your preference. The door is sold bare, allowing you to prime and finish it to match your home's exterior.

- Made of composite wood with a 1-3/4 in. thick solid-core construction
- Flush slab door design with a natural wood appearance
- Can be primed, stained or painted to match your home
(The Association's maintenance technician will paint the door)
- Requires finishing on all 6 sides
- Reversible handing allows flexibility when installing
